Index of Authors

Small roman numerals refer to pages in the Proceedings of the Society for General Microbiology

AINSWORTH, P. J. & COLEMAN, G. Comparison of galactokinase induction in protoplasts and intact bacteria of *Bacillus megaterium* 216 227

ALLAM, A. M. & ELZAINY, T. A. Purine catabolism in *Fusarium moniliforme* 183

ANDERSON, J. G. & SMITH, J. E. A fermentor culture system for sporulation studies on *Aspergillus niger* xii

BARRY, R. D., *see* BROMLEY, P. A. Studies on the nature of influenza virus ribonucleic acid xvi

BARRY, R. D. & MAHY, B. W. J., *see* HUTCHINSON, J. E. The nature of the ribonucleic acid synthesized *in vitro* by Sendai virus-induced ribonucleic acid-dependent ribonucleic acid polymerase xv

BEACHAM, I. R. The thymidine triphosphate pool in wild-type and thymine-requiring strains of *Escherichia coli* K12 and 15 vii

BECKETT, A. & CRAWFORD, R. M. Nuclear behaviour and ascospore delimitation in *Xylosphaera polymorpha* 269

VAN DER BEEK, E. G., STOUTHAMER, A. H. & KEPTELN, W. M. C., *see* DE VRIES, W. Molar growth yields and fermentation balances of *Lactobacillus casei* L3 in batch cultures and in continuous cultures 333

BESWICK, T. S. L., *see* MIRANDA, Q. R. Anti-interferon factors in the digestive tract xvi

BILLETER, M. A., DAHLBERG, J. E., GOODMAN, H. M., HINDLEY, J. & WEISSMANN, C. Studies on the structure of the genome of phage Qβ v

BLUNDELL, M. R. & WILD, D. G. The accumulation of ribosome precursors during inhibition by cobalt chloride xvii

BLUNDELL, M. R. & WILD, D. G. Altered ribosomes after inhibition of *Escherichia coli* by rifampicin xvii

BROMLEY, P. A. & BARRY, R. D. Studies on the nature of influenza virus ribonucleic acid xvi

BULL, A. T. Chemical composition of wild-type and mutant *Aspergillus nidulans* cell walls. The nature of polysaccharide and melanin constituents 75

BURTON, K. Effects of purine nucleotide concentrations on RNA synthesis in *Escherichia coli* i

CALLELY, A. G., *see* STAFFORD, D. A. Properties of a pyridine-degrading organism xiv

CAMPBELL, I. Comparison of serological and physiological classification of the genus *Saccharomyces* 189

CARLILE, M. J. Nutrition and chemotaxis in the myxomycete *Physarum polycephalum*: the effect of carbohydrates on the plasmodium 221

CHARLES, H. P., *see* ROBERTS, G. A. Mutants of *Neurospora crassa*, *Escherichia coli* and *Salmonella typhimurium* specifically inhibited by carbon dioxide 21

CHATER, K. F. Dominance of the wild-type alleles of methionine regulatory genes in *Salmonella typhimurium* 95

CHATER, K. F., LAWRENCE, D. A., ROWBURY, R. J. & GROSS, T. S. Suppression of methionyl transfer RNA synthetase mutants of *Salmonella typhimurium* by methionine regulatory mutations 121

CHATER, K. F. & ROWBURY, R. J. A genetical study of the feedback-sensitive enzyme of methionine synthesis in *Salmonella typhimurium* 111

CHOPRA, I. Decreased uptake of cadmium by a resistant strain of *Staphylococcus aureus* 265

COLEMAN, G., *see* AINSWORTH, P. J. Comparison of galactokinase induction in protoplasts and intact bacteria of *Bacillus megaterium* 216 227

COLEMAN, G. S., *see* ORPIN, C. G. The cultivation of 'ovals' from the ovine rumen xii

COLLINS, J. The timing of episomal F replication in *Escherichia coli* at different growth rates viii

COLLINS, P. B., *see* WINDER, F. G. Inhibition by isoniazid of synthesis of mycolic acids in *Mycobacterium tuberculosis* 41

CORFIELD, P. S. & SMITH, D. G. The endoplasmic reticulum as the site of potassium tellurite reduction in yeasts 311

CRAWFORD, R. M., *see* BECKETT, A. Nuclear behaviour and ascospore delimitation in *Xylosphaera polymorpha* 269

DAHLBERG, J. E., GOODMAN, H. M., HINDLEY, J. & WEISSMANN, C., *see* BILLETER, M. A. Studies on the structure of the genome of phage Qβ v

DARBY, G. K., DUMAS, L. B. & SINSHEIMER, R. L. Pyrimidine sequences in the complementary strand of the replicative form of bacteriophage ϕX 174 DNA x

DOUGLAS, H. W., RUDDICK, S. M. & WILLIAMS, S. T. A study of the electrokinetic properties of some actinomycete spores 289

DROZD, J. & POSTGATE, J. R. Effects of oxygen on acetylene reduction, cytochrome content and respiratory activity of *Azotobacter chroococcum* 63

DUMAS, L. B. & SINSHEIMER, R. L., *see* DARBY, G. K. Pyrimidine sequences in the complementary strand of the replicative form of bacteriophage ϕX 174 DNA x

EDWARDS, D. I. & MATHISON, G. E. The mode of action of metronidazole against *Trichomonas vaginalis* 297

ELZAINY, T. A., *see* ALLAM, A. M. Purine catabolism in *Fusarium moniliforme* 183

FERGUSON, H. M., *see* HOPWOOD, D. A. Genetic recombination in a thermophilic actinomycete, *Thermoactinomyces vulgaris* 133

GAUDIE, D. & TRISTRAM, H. Proline biosynthesis: regulation by a positive control mechanism? xiii

GOODMAN, H. M., HINDLEY, J., WEISSMANN, C. & DAHLBERG, J. E., *see* BILLETER, M. A. Studies on the structure of the genome of phage Qβ v

Index of Subjects

Small roman numerals refer to pages in the Proceedings of the Society for General Microbiology

Actinomycetes, electrokinetic properties (Douglas, Ruddick & Williams) 289
Amides as nitrogen source for Aspergillus (Hynes & Pateman) 317
D-1-Aminopropan-2-ol dehydrogenase activity (Lowe & Turner) 49
Antigens, group, in Rhizobium (Vincent & Humphrey) 379
Antigens of lactobacilli group A (Knox & Wicken) 237
Ascospore formation in Xylosphaera (Beckett & Crawford) 269
Aspergillus nidulans, chemical composition of cell walls (Bull) 75
Aspergillus nidulans, source of amides (Hynes & Pateman) 317
Aspergillus niger, esterase (Lloyd, Morris & Smith) 141
Aspergillus niger, fatty acid and glucose metabolism in (Lewis) 203
Aspergillus niger, fermentor culture for sporulation (Anderson & Smith) xii
Azotobacter, acetylene reduction (Drozd & Postgate) 63

Bacillus megaterium, effect of glutaraldehyde on protoplasts (Munton & Russell) 367
Bacillus megaterium, galactokinase in (Ainsworth & Coleman) 227
Bacillus megaterium, protoplasts (Kusaka) 199
Bacillus megaterium, two types of spores (Watanabe & Takesue) 375
Bacillus subtilis cell walls and magnesium adsorption (Meers & Tempest) 325
Bacteriophage ϕX 174 DNA (Darby, Dumas & Sinsheimer) x
Bacteriophages, effect of nucleic acids during mixed infections (Lunt) iv
Bordetella pertussis, defined medium for (Stainer & Scholte) 211
Bromegrass mosaic virus, RNA synthesis by cell-free extracts of barley (Semal & Kummert) ix

Cadmium uptake by *S. aureus* (Chopra) 265
Candida lipolytica, esterase (Lloyd, Morris & Smith) 141
Carbohydrate content of *M. tuberculosis*, effect of medium on (Winder & Rooney) 29
Carbohydrate metabolism in *L. casei* (de Vries, Kapteijn, van der Beek & Stouthamer) 333
Carbon assimilation in methane-utilizing bacteria (Lawrence & Quayle) 371
Carbon dioxide, mutants specifically inhibited by (Roberts & Charles) 21
Cell walls of Aspergillus, chemical composition of (Bull) 75
Cellobiose utilization by *Verticillium albo-atrum* (Heale & Gupta) 175
Cellulase in *Verticillium albo-atrum* (Gupta & Heale) 163
Chemostat with feedback, theory of (Pirt & Kurowski) 357
Chemotaxis in myxomycete *P. polycephalum* (Carlile) 221
Classification of genus *Saccharomyces* (Campbell) 189
Classification of mycoplasmas (Neimark) 249
Clostridium botulinum spores, heat resistance and dipicolinic acid (Grecz & Tang) 303
Clostridium pasteurianum, ultrastructure (Mackey & Morris) xiii
Cobalt chloride inhibition and ribosome precursors (Blundell & Wild) xvii
Culture, batch or continuous, of *L. casei* (de Vries, Kapteijn, van der Beek & Stouthamer) 333
Culture, mixed, of two rumen bacteria (Hobson & Stewart) xi

Desulfotomaculum and Desulfovibrio, N_2 fixation by (Postgate) 137
C_4-Dicarboxylic acid metabolism by *E. coli* (Herbert & Guest) 151
Didymium nigripes, nuclear size in plasmodia (Kerr) 347
Digestion of interferon (Miranda & Beswick) xvi
Dipicolinic acid in *C. botulinum* spores (Grecz & Tang) 303
DNA base composition of mycoplasmas (Neimark) 249
DNA, discovery of (Pollock) 1
DNA replication in *E. coli* (Zaritsky) vi
DNA synthesis in *S. typhimurium* (Spratt & Rowbury) viii
DNA-less cells in *S. typhimurium* (Spratt & Rowbury) ix
Drug action on Trichomonas (Edwards & Mathison) 297

Electron microscopy of protoplasts of *B. megaterium* (Kusaka) 199
Endoplasmic reticulum and tellurite reduction in yeasts (Corfield & Smith) 311
Escherichia coli, DNA replication in (Zaritsky) vi

Escherichia coli, episomal F replication in (Collins) viii
Escherichia coli, metabolism of amino ketones (Lowe & Turner) 49
Escherichia coli mutant, synthesis of ribosomes (Mehdi & Wild) xviii
Escherichia coli, mutants inhibited by CO_2 (Roberts & Charles) 21
Escherichia coli mutants, properties of male derivatives (Nandadasa) viii
Escherichia coli, mutations affecting dicarboxylic acids (Herbert & Guest) 151
Escherichia coli, RNA synthesis (Burton) i
Escherichia coli, thymidine triphosphate pool (Beacham) vii
Esterases of some fungi (Lloyd, Morris & Smith) 141
Excystment of Hartmannella (Stratford & Griffiths) xi

Fatty acid metabolism in *Aspergillus niger* 203
Feedback of organisms in chemostat, theory of (Pirt & Kurowski) 357
Fungi, esterases in (Lloyd, Morris & Smith) 141
Fusarium graminearium, growth stimulant in wheat anthers (Strange & Smith) x
Fusarium moniliforme, purine catabolism (Allam & Elzainy) 183

Galactokinase in *B. megaterium* (Ainsworth & Coleman) 227
Genes regulating methionine in *S. typhimurium* (Chater) 95
Genome of phage Qβ, structure (Billeter, Dahlberg, Goodman, Hindley & Weissmann) v
Glucose metabolism in *Aspergillus niger* (Lewis) 203
Glutaraldehyde, effect on protoplasts (Munton & Russell) 367
Griffith Memorial Lecture, third (Pollock) 1
Growth of *B. pertussis* (Stainer & Scholte) 211
Growth stimulant in wheat anthers (Strange & Smith) x

Hartmannella castellanii, excystment (Stratford & Griffiths) xi
Heat resistance of *C. botulinum* spores and dipicolinic acid (Grecz & Tang) 303
Homoserine-*O*-transsuccinylase in methionine-excreting mutants (Chater & Rowbury) 111

Influenza virus RNA (Bromley & Barry) xvi
Interferon destruction in digestive tract (Miranda & Beswick) xvi
Isoniazid inhibition of mycolic acids in *M. tuberculosis* (Winder & Collins) 41

Ketones, amino, metabolism in *E. coli* (Lowe & Turner) 49

Lactobacillus casei, carbohydrate metabolism in batch or continuous culture (de Vries, Kapteijn, van der Beek & Stouthamer) 333
Lactobacillus helveticus, antigens from (Knox & Wicken) 237
Life cycle of *Mycoplasma pulmonis* (Tanaka & Woods) 281

Magnesium adsorption by cell walls (Meers & Tempest) 325
Medium for *B. pertussis* (Stainer & Scholte) 211
Methane-utilizing bacteria, carbon assimilation in (Lawrence & Quayle) 371
Methionine feedback-resistant mutants in *S. typhimurium* (Chater & Rowbury) 111
Methionine regulation in *S. typhimurium* (Chater) 95
Methionyl transfer RNA synthetase mutants in *S. typhimurium* (Chater, Lawrence, Rowbury & Gross) 121
Metronidazole action on Trichomonas (Edwards & Mathison) 297
Micrococcus dinitrificans, respiration (Sapshead & Wimpenny) xiv
Microelectrophoresis of actinomycete spores (Douglas, Ruddick & Williams) 289
Microscopy, electron, of *Mycoplasma pulmonis* (Tanaka & Woods) 281
Mutants, defective, of *E. coli* (Nandadasa) viii
Mutants of *E. coli* and utilization of dicarboxylic acids (Herbert & Guest) 151
Mycobacterium tuberculosis BCG, composition (Winder & Rooney) 29
Mycobacterium tuberculosis, inhibition of mycolic acids by isoniazid (Winder & Collins) 41
Mycolic acid synthesis by *M. tuberculosis*, isoniazid inhibition of (Winder & Collins) 41
Mycoplasma pulmonis, ultrastructure and life cycle (Tanaka & Woods) 281
Mycoplasmas, DNA base composition of (Neimark) 249

Neurospora crassa, mutants inhibited by CO_2 (Roberts & Charles) 21
Nitrogen fixation, inhibition by oxygen (Drozd & Postgate) 63
Nitrogen fixation by rumen sulphate-reducing bacteria (Postgate) 137
Nitrogen source for *Aspergillus nidulans* (Hynes & Pateman) 317
Nuclear behaviour in Xylosphaera (Beckett & Crawford) 269
Nucleic acid content of *M. tuberculosis*, effect of medium on (Winder & Rooney) 29
Nucleic acids of animal viruses (Subak-Sharpe) v
Nucleic acids, fate in mixed infections (Lunt) iv
Nuclei in slime mould plasmodia (Kerr) 347
Nuclei, somatic cell, expression of genetic information (Harris) vi
Nutrition of myxomycete *P. polycephalum* (Carlile) 221

Organism dependent on pyridine (Stafford & Callely) xiv
'Ovals' from ovine rumen (Orpin & Coleman) xii

Oxygen, inhibition of acetylene reduction (Drozd & Postgate) 63
Oxygen-induced proton pulses in bacteria (Wimpenny) xv

Petite mutation in *S. cerevisiae* (Williamson, Maroudas & Wilkie) vii
Phage Qβ, structure of genome (Billeter, Dahlberg, Goodman, Hindley & Weissmann) v
Physarum polycephalum, nutrition and chemotaxis in (Carlile) 221
Plasmodia of slime mould, nuclear size in (Kerr) 347
Polysaccharide and melanin constituents of Aspergillus cell walls (Bull) 75
Potassium tellurite reduction in yeasts (Corfield & Smith) 311
Proline biosynthesis, regulation (Gaudie & Tristram) xiii
Proton pulses in various bacteria (Wimpenny) xv
Protoplasts of *B. megaterium* (Kusaka) 199
Protoplasts of *B. megaterium*, galactokinase in (Ainsworth & Coleman) 227
Protoplasts, effect of glutaraldehyde on (Munton & Russell) 367
Purine catabolism in Fusarium (Allam & Elzainy) 183
Pyridine-degrading organism, properties of (Stafford & Callely) xiv
Pyrimidine sequences in phage DNA (Darby, Dumas & Sinsheimer) x

Recombination in a thermophilic actinomycete (Hopwood & Ferguson) 133
Regulation of proline biosynthesis (Gaudie & Tristram) xiii
Replication, episomal F, in *E. coli* (Collins) viii
Respiration of *Micrococcus denitrificans* (Sapshead & Wimpenny) xiv
Rhizobium, taxonomy (Vincent & Humphrey) 379
Ribosome precursors produced by cobalt chloride inhibition (Blundell & Wild) xvii
Ribosome structure (Walker) ii
Ribosome synthesis (Turnock) iii
Ribosome synthesis in *E. coli* mutant (Mehdi & Wild) xviii
Ribosomes after inhibition of *E. coli* by rifampicin (Blundell & Wild) xvii
Rifampicin altering ribosomes in *E. coli* (Blundell & Wild) xvii
RNA from influenza virus (Bromley & Barry) xvi
RNA synthesis by cell-free extracts of virus-infected barley (Semal & Kummert) ix
RNA synthesis in *E. coli* (Burton) i
RNA synthesis by Sendai virus-infected cells (Hutchinson, Mahy & Barry) xv
tRNA structure and function (Smith) ii
Rumen bacteria in mixed culture (Hobson & Stewart) xi
Rumen bacteria, N_2 fixation by (Postgate) 137
Rumen, ovine, 'ovals' from (Orpin & Coleman) xii

Saccharomyces cerevisiae, petite mutation induction (Williamson, Maroudas & Wilkie) vii
Saccharomyces, serological and physiological classification of genus (Campbell) 189
Salmonella typhimurium, DNA synthesis in (Spratt & Rowbury) viii
Salmonella typhimurium, DNA-less cells in (Spratt & Rowbury) ix
Salmonella typhimurium, methionine feedback-resistant mutants (Chater & Rowbury) 111
Salmonella typhimurium, methionine regulatory genes (Chater) 95
Salmonella typhimurium, methionine regulatory mutants (Chater, Lawrence, Rowbury & Gross) 121
Salmonella typhimurium, mutants inhibited by CO_2 (Roberts & Charles) 21
Sendai virus, RNA (Hutchinson, Mahy & Barry) xv
Serology of genus *Saccharomyces* (Campbell) 189
Sodium chloride concentration and magnesium binding in cell walls (Meers & Tempest) 325
Spores of Actinomycetes, electrokinetic properties (Douglas, Ruddick & Williams) 289
Spores of *B. megaterium*, two types (Watanabe & Takesue) 375
Sporulation of *A. niger* in fermentor culture (Anderson & Smith) xii
Staphylococcus aureus, cadmium uptake by (Chopra) 265
Structure of ribosomes (Walker) ii
Suppression by regulatory mutations in *S. typhimurium* (Chater, Lawrence, Rowbury & Gross) 121
Suppressor transfer RNAs (Smith) ii
Symposium: Function and metabolism of nucleic acids
  Effects of purine nucleotide concentrations on RNA synthesis in *Escherichia coli* (Burton) i
  Suppressor transfer RNAs and their use in the study of tRNA structure and function (Smith) ii
  The structure of the ribosome (Walker) ii
  The synthesis of ribosomes in bacteria (Turnock) iii
  The fate of nucleic acids during mixed infections with bacteriophages (Lunt) iv
  Studies on the structure of the genome of phage Qβ (Billeter, Dahlberg, Goodman, Hindley & Weissmann) v
  Nucleic acids of animal viruses (Subak-Sharpe) v
  The expression of genetic information by somatic cell nuclei (Harris) vi
Synthesis of ribosomes (Turnock) iii

Taxonomy of Rhizobium (Vincent & Humphrey) 379

Teichoic acids of *L. helveticus* (Knox & Wicken) 237
Thermoactinomyces vulgaris, genetic recombination in (Hopwood & Ferguson) 133
Thymidine triphosphate pool in *E. coli* (Beacham) vii
Trichomonas vaginalis, action of metronidazole on (Edwards & Mathison) 297

Ultrastructure of *Clostridium pasteurianum* (Mackey & Morris) xiii

Verticillium albo-atrum, cellulase in (Gupta & Heale) 163
Verticillium albo-atrum, utilization of cellobiose (Heale & Gupta) 175
Viruses, animal, nucleic acids of (Subak-Sharpe) v

Xylosphaera polymorpha, nuclear behaviour and ascospore delimitation (Beckett & Crawford) 269

Yeasts, site of potassium tellurite reduction (Corfield & Smith) 311
